4. The second option in the “Grants Status” field, within the Send Grant Status Update menu, has been changed from “JIT Info Requested” to “Post-Submission Update Requested.” This activity is available to PI, Staff, and Specialists.

Post-submission updates can now be used to correct inaccurate information for funding proposals that are in the Pending Sponsor Review state. FSU will continue to document post-submission revisions requested by the sponsor as proposal attachments, maintaining the original submission information in the funding proposal and proposal budget smartforms.

Either as an initiating activity, or upon receipt of the request from the PI and Staff using the Send Grant Status Update activity, Specialists will put the funding proposal in the “Post-Submission Update Requested state.” This state allows the funding proposal and proposal budget smartforms to be edited.

Once the Specialist has put the proposal into the Post-Submission Update Requested state, the Submit Post-Submission Update activity becomes available to the PI and Staff.

Executing the Submit Post-Submission Update activity puts the funding proposal back in the Pending Sponsor Review state and sends a notification to the central office . Please reach out to the Specialist using the Send Email activity if you would like them to review the changes before they are submitted in the system.

The notification contains the following:

1. To (Recipient): Proposal's assigned specialist
2. Subject Line: [Proposal ID] Post-submission updates have been submitted for review
3. Message body:
 - a. Proposal: [Link to the Proposal workspace, e.g. FP00001349]

 - c. Post-submission update deadline: [Deadline date added to the Request Post-submission Update activity]
4. Sponsor: [Name of direct sponsor]
